PROJECTS

Netflix Data Analytics & Automation Pipeline | *Java, Spring Boot, Python, Streamlit, SQL*

- Engineered a full-stack data pipeline automating the ingestion, processing, and visualization of Netflix datasets.
- Developed backend logic in Java/Spring Boot and an interactive Streamlit dashboard for trend analysis.
- Integrated an H2/SQLite database for persistent storage and historical tracking.

Data Automation Pipeline | *Python, Pandas, SQLite*

- Built a lightweight ETL script to automate data synchronization between REST APIs and a structured SQL database.
- Utilized Pandas for schema mapping, string normalization, and data cleaning of fetched JSON data.

Study Timer & Lofi Ambiance | *HTML, CSS, JavaScript*

- Developed a productivity web app featuring a customizable Pomodoro timer and integrated Spotify player.
- Implemented dynamic backgrounds and thematic UIs (e.g., Rainy Study) to enhance user focus and ambiance.
- [Live Demo: niksxoX.github.io/study-timer/](https://niksxoX.github.io/study-timer/)

Music-Player (DLL Visualizer) | *Java, Swing GUI*

- Designed a Java application to visualize Doubly Linked Lists as a music queue, featuring .wav audio playback.
